SUMMARY

Full-stack developer from Surat with almost five years of experience. For the last year I have been leading the development team at Cloudus Infotech. I plan new projects with the client, pick the tech, split the work and build alongside the team. Most of my work is Next.js and NestJS on the web and Flutter on mobile, deployed on AWS. I have worked on eSIM stores, school software and hotel websites, and I look after SEO and payments on the projects I run. I am looking for a remote role.

SKILLS

Frontend	Next.js, React, TypeScript, Tailwind CSS, SCSS, Redux, Storybook
Backend	Node.js, NestJS, Express, Laravel, REST APIs, Socket.IO
Databases	MySQL, PostgreSQL, MongoDB, Redis, Prisma, Firebase
Mobile	Flutter, Dart
Cloud & DevOps	AWS (EC2, S3, Amplify), Ubuntu servers, Nginx, CI/CD
Also	Technical SEO, Stripe, Razorpay, PayPal, Contentstack, Webflow
AI tools	Claude Code, Codex, GitHub Copilot, Gemini

EXPERIENCE

Tech Lead — May 2025 - Present
Cloudus Infotech Pvt. Ltd. | Surat

- Lead the development team: sprint planning, code reviews and mentoring the developers.
- Turn client requirements into a plan (scope, stack, timeline) and stay in touch with the client until release.
- Build with Next.js, NestJS, MySQL and PostgreSQL. Deploy to AWS and Ubuntu servers with Nginx and CI/CD.
- Set up login (JWT, Firebase, 2FA) and payments (Stripe, Razorpay, PayPal and others).
- Handle SEO and page speed on client sites: hreflang, sitemaps, structured data.
- Use Claude Code, Copilot and Codex for research, planning and reviewing code.

Senior Developer — May 2024 - Apr 2025
Cloudus Infotech Pvt. Ltd. | Surat

- Built web apps with Next.js and TypeScript.
- Led the frontend of WaoSim, an eSIM store with six payment methods.
- Added two-factor login, affiliate tracking, multiple languages and currency switching.
- Set up a Storybook component library and CI/CD pipelines.

Jr. React.js Developer

Dec 2021 - Apr 2024

Rejoicehub LLP | Surat

- Built mobile-first web apps with React and Vite.
- Managed app state with Redux and Context API.
- Connected REST APIs, built reusable components, and joined sprints, QA and releases.

SELECTED PROJECTS

WaoSim main.waosim.com — **Project Team Lead**

eSIM store in English and Japanese. I led three Next.js apps from the first commit: the customer site, the admin panel and the affiliate portal. Also worked on payments, social login, 2FA and the fixes from a VAPT security audit.

OlySim olysim.com — **Lead Web & SEO Developer**

eSIM store with two sites, olysim.in in rupees and olysim.com in dollars. I worked on the customer site, checkout and payments, and the SEO for both domains.

SIRO Hotels sirohotels.com — **Frontend Developer**

Hotel website in Dubai, run from Contentstack CMS. Heavy video and images, and still 90+ on Lighthouse.

Exambro exambro.app — **Frontend Lead**

School exam platform for many schools, with separate dashboards for admins, teachers and students, printable papers and live tests.

Ling Ling Dubai linglingdubai.com — **Frontend Developer**

Custom website for a Pan-Asian restaurant and nightlife venue in Dubai, built in Next.js and SCSS with all content in Contentstack.

Dukkan by Qatar Duty Free private platform — **Frontend Developer**

Online store for Qatar Duty Free employees. Admins change page layouts from the CMS.

Barbera barbera.io — **Frontend Developer**

Customer side of a salon software product: browsing services and booking appointments, in React.

MentalHappy mentalhappy.com — **Full-Stack & Flutter Developer**

Website and mobile app that connect people with therapists and support groups.

EDUCATION

Bachelor of Engineering (B.E.)

2020 | CGPA 7.9

Gujarat Technological University, A.D. Patel Institute of Technology

LANGUAGES

English, Hindi, Gujarati
